## EDUCATION

### **BACHELOR OF TECHNOLOGY (CSE)**

- Govt. P.G. College, Dharamshala
- Anticipated Graduation: June 2025

### DIPLOMA IN COMPUTER ENGINEERING

- ABV Govt. Institute of Engineering & Technology
- Completed: May 2022

## SKILLS

- Technical Skills
  - Frontend: React.js, Tailwind CSS, Daisy UI, Shadcn UI
  - Backend: Node.js, Express.js
  - Database: MongoDB
  - API: RESTful API Development & Integration
  - State Management / Data
    Fetching: TanStack Query (React
    Query)
  - Tools: Git, GitHub (Version Control)

## **PROFILE SUMMARY**

A motivated and dedicated Full-Stack Web Developer with a strong foundation in the MERN stack (MongoDB, Express.js, React, Node.js). Skilled in building responsive and interactive user interfaces using Tailwind CSS and DaisyUI. Experienced in integrating third-party services like Nodemailer for email functionality and Cloudinary for media storage and management. Although a fresher, I have completed several personal and academic projects that showcase my ability to deliver clean, efficient code and engaging user experiences. Eager to apply my technical skills to real-world projects and contribute to a dynamic development team.

## PROJECTS

## Job Portal Web App (MERN Stack)

- Developed a fully functional job portal using the MERN stack that allows users to register, search for jobs, and apply for positions.
- Implemented features like authentication (JWT), resume upload, and user profile management.
- Integrated RESTful APIs for job postings and employer functionalities.
- Ensured secure and scalable backend using Node.js and MongoDB.

### Social Media Web App

- Real-time messaging with Socket.io
- Al assistant for user queries
- Customizable user profiles and secure authentication (JWT)
- Responsive UI with Tailwind CSS and DaisyUI
- RESTful APIs with Express.js and MongoDB
- Utilized TanStack Query (React Query) for efficient data fetching and state management

### **Other Projects**

- Created several small projects using the MERN stack (MongoDB, Express.js, React.js, Node.js), along with TanStack Query for efficient data fetching and Tailwind CSS for responsive UI design.
- See my work on Fueler and GitHub.
- Developed projects using free APIs to dynamically fetch and display data.
- Deployed projects using Render, Netlify, and implemented CI/CD pipelines for seamless integration and deployment
